

SINGLE ALLEY HANDLING ASSEMBLY

The **2W Single Alley Handling Assemblies** are designed in seven foot sections to allow customers to choose the correct length that fits their needs. A three section alley allows the system to be curved or angled allowing both "S" or "C" shaped configurations. These alleys are adjustable from 19"-28" depending on the type of livestock being handled. **2W Alley Assemblies** feature "Alley Stops" which allow for cattle to flow in the designated direction and restrict the animal from backing up. Available with "400, 500, or 600" Series hookups.

Design services are offered by 2W and 2W's Dealers to aid with any customers looking to purchase a **Heavy Duty Corral Handling System**.
